

### **ABOUT BELVI**

Belvi: The Nancy Oppito Center for Family Health provides affordable and reliable primary care to families in Haiti, specializing in preventive care, women's health, and family medicine.

Belvi provides membership based services including:

- Wellness or preventive check-ups
- Screening or diagnostic visits
- Maintenance check-ups
- Urgent illness or injury specific visits

In addition to providing affordable preventive care and medical treatment, Belvi also provides discounted referrals for testing and specialized care.

During the COVID-19 pandemic, Matthew 25: Ministries supported the production in Haiti of cloth face masks which were distributed by Belvi to hospitals and healthcare facilities throughout the country. Belvi provided more than 200,000 masks to local organizations to help protect their employees and support their efforts to safely serve the surrounding communities.

Belvi also offers pop-up clinics to local schools and organizations, providing wellness check-ups and early intervention for chronic conditions.

After the 2021 earthquake in Haiti occurred, Belvi's medical staff traveled to the disaster area, providing medical care to those affected, helping to meet Haiti's immediate healthcare needs and alleviating strain on local resources.

## TESTIMONIALS

*"All our new patients are so happy about our clinic. One of them said this is the first time he has been seen by a doctor and felt great satisfaction. In Haiti, doctors do not often spend time with patients to ask questions to find out what's wrong, so the care he received from our staff was very special to him."*

Belvi Staff Member

*"So many patients who were treated by our doctor for illnesses, conditions or diseases came back to say that they don't feel symptoms any more or they are feeling much better while taking the medicines they have been prescribed."*
